Biomimetic Oligo Peptide Rejuvenating Serum

Bio-Placenta Rejuvenating Serum delivers an innovative combination of Biomimetic Peptides, Neuropeptides, and Oligo Elements in one revolutionary product. The state-of-the-art formulation includes 5 unique peptides, also known as growth factors, that are molecularly identical to the life-giving growth factors found in the human placenta. When applied topically, these growth factors help reverse the aging process and repair existing damage.

DAILY APPLICATION

Apply twice daily to clean dry skin, morning and night.

DIRECTIONS

Place two pumps into palm of hand. Apply to the face and neck in an upward motion.

BENEFITS

HOW IT WORKS

These five growth factors are the cutting edge of skincare formulation, and are defined as the Epidermal Growth Factor (EGF) to promote regeneration, Insulin-like Growth Factor (IGF-1) to support anti-wrinkle, Acidic Fibroblast Growth Factor (AFGF) to help firm, Basic Fibroblast Growth Factor (BFGF) to increase elasticity, and Vaso-Endothelial Growth Factor (VEGF) to provide nutrition.

These biomimetic cell-signaling peptides combat the signs of aging by boosting regeneration, collagen production, and reinforcing capillaries and circulation. When applied topically, these growth factors help reverse the aging process and repair existing damage.

Within the Bio-Placenta Rejuvenating Serum formula, technologically advanced ingredients work synergistically to activate skin to function as it did in its youth. This multifaceted super serum helps minimize the appearance of expression lines and wrinkles, supports thin, fragile skin and increases elasticity as it regenerates, and restructures. With regular use, it also works to firm, fortify, and re-densify, while providing nutrition by delivering vital support for healthy skin.
